

PLOFLON Teflon Klebeband mit Silikonkleber SW10003

Product	Product category	Coating
---------	------------------	---------

PLOFLON PTFE GLASS FABRIC
Self adhesive

Premium Serie

Silicone PSA

PLOFLON Premium Series
PTFE/glass fabrics coated on one side
with high temperature pressure
sensitive silicone adhesive. Yellow
textured PVC release liner is applied to
the adhesive surface for ease of
application.

Some application: Easy release
surface on heat sealing and packaging
machines, ironing and pressing
equipment, covering drying cylinders,
lining chutes, release surface on
bonding tools.

Properties	Value	Unit
Standard width <small>Please ask for other widths</small>	10, 20, 30, 40, 50, 100, 150, 300, 400, 500, 600,	mm
Backing thickness	0,125 / 0,140 / 0,240	mm
Total thickness	0,175 / 0,190 / 0,290	mm
Backing weight	255 / 296 / 490	gr/m ²
Adhesion	5,40	N/cm
Temperature resistance	-73° / +260°	Celsius
Roll length:	30	m

Note: Nominal thickness, weight and tensile strength values are typical and are not intended as a specification minimum. Weight Tolerance g/m² = ±%5
